

# MYOB EXO Portable Timeclocks

Save time as you track time.

In today's flexible business environment, many workforces are spread across multiple sites that are not suited to the traditional timeclock style of record-keeping. MYOB EXO Portable Timeclock is a cost-effective way to capture this data on remote sites, reducing time theft and saving valuable hours tracking staff attendance.

Used in conjunction with MYOB EXO Time and Attendance software, MYOB EXO Portable Timeclock ensures effective management of employee attendance and payroll. After use, it is simply returned to base and data is downloaded to MYOB EXO Time and Attendance for analysis. Hours worked, overtime and allowances are calculated and passed onto the payroll application for employee payment.

### Clock on anytime, anywhere

MYOB EXO Portable Timeclock allows your staff to clock on and off anywhere, anytime. Management and staff can use it to track their hours worked and the jobs they are working on.

### Key features

- Ideal for use in remote environments, with 7-10 day battery life (rechargeable)
- Employees clock on and off using either a built-in keypad or an additional barcode scanner
- Cost Centre data can be tracked daily or weekly as required
- Designed to be carried, but also comes with a wall mounting bracket making it an inexpensive alternative to the traditional wall mounted punchclock.

MYOB EXO Portable Timeclock can be used on worksites as diverse as:

- Construction sites
- Orchards
- Vineyards
- Forestry operations
- Marine projects
- Offshore vessels
- Trades and service industries
- Manufacturing

### Technical specifications
