

Employer Services factsheet

MYOB PC Clock

Time and attendance without a timeclock

Tracking your employees' time accurately is essential to your bottom line, but it can be time-consuming and tedious. MYOB PC Clock integrates with MYOB Time and Attendance to save you time and money. Staff simply record their clock-on and clock-off times at any designated computer on the company network.

Track your employees' time and attendance the easy way

MYOB PC Clock can be run by staff at remote branches or within separate departments. Employees simply enter their individual code and job number in a single screen with an easy to use, intuitive interface, using a keyboard, mouse or even a barcode scanner.

Harness the power of your payroll

MYOB PC Clock integrates with MYOB Time and Attendance so the captured data can be automatically used to calculate hours worked, overtime, statutory days and allowances. There are no manual calculations and once checked, the data is transferred directly to your payroll system. It's that easy.

Information at your fingertips

MYOB PC Clock tracks the actual time spent on jobs or projects and imports pay-period files from different sites simultaneously. Pay information can also be checked by supervisors on site. A range of reports is available, so you can review clockings before you post them to MYOB Time and Attendance.

Features at a glance:

- Substantial savings in time and cost – minimises time theft
- Greater accuracy – no more timesheets
- Easy to use, intuitive interface
- No need to purchase time-keeping hardware
- Can be run by unlimited number of remote sites or departments

- Runs from any PC - networked or standalone
- Unlimited number of PC clocks
- Tracks actual time spent on jobs or projects
- Reduces time spent transferring pay period data into payroll
- Imports pay period files from different sites simultaneously
- Tracks attendance from anywhere
- Automatically consolidates all information
- Integrates with MYOB Time and Attendance so 'rules' are automatically applied
